

Setting a new standard in clinical workflow automation

OmniLife Health builds purposeful workflow and communication solutions, helping care teams collaborate across complex clinical environments to achieve optimal outcomes.

Simplify complex workflows. Don't reinvent them.

OmniLife Health's flagship clinical workflow automation SaaS platform digitizes all the work happening outside the EHR to change the conversation around care collaboration.

"OmniLife Health makes my job so much easier.

It provides a simple way to communicate with all the team members involved in the transplant and keeps everyone on the same page."

Leslie McCloy RN, MNHP, CCRN

Post Kidney/Pancreas Transplant Coordinator
University of Iowa Hospitals and Clinics

Purpose-Built for Complex Care

Encourage collaboration in complex environments.

Empower Care Teams

Increase productivity and reduce the impact of staffing shortages.

Create Structure

Simplify clinical workflows and standardize complex care pathways.

Optimize Performance and Outcomes

Drive process improvements and optimize billing.
